Marvel in Full Touch Entertainment

Stylish mobility with great entertainment features, Samsung's new S5560 makes a splash with full-touch convenience and advanced connectivity. Streamlined in form and usability, this mobile offers an easy-to-use experience thanks to the full-touch screen, Touch Wiz software, and drag-and-drop widgets. You can also entertain yourself for hours with the S5560's rich multimedia features. It's easy to snap photos, listen to tunes, surf the web, or connect with your online social communities with Samsung Mobile's latest touch phone. Packed with style, entertainment, connectivity and ease-of-use, the S5560 is truly a mobile to marvel at.

Full Touch Experience

You will enjoy the ease and intuitive handling of the full touch screen. The large 7.62cm (3) is powered by Touch Wiz 1.0 and allows users to drag and drop widget applications for home screen customization. Tired of hunting and pecking for letters when sending messages? With Handwriting Recognition, users can write out what they want to say, easily and naturally.

Marvelous Design

Designed to impress, the mobile's sleek and smooth design underscores its full touch abilities. Easy to grip and comfortable to use, the mobile also stows away in your palm, purse and pocket easily thanks to its slim frame.

Easy Connectivity

You will have anytime, anywhere access to the internet, social networking communities, content sharing, as well as a host of other services enabled by Wi-Fi, Bluetooth and USB connectivity. Browse on the go using the easy-to-use Dolfin Browser, and connect to popular SNS through widgets for Facebook, Friendster, MySpace, etc.

Capture & Share Your Moments

You can capture and share precious moments easily with the built-in 5 Megapixel camera. With its advanced features, there's no need to carry around another digital camera. The mobile can auto focus, recognise faces for better portrait photos and adjust settings for optimal results. The camera also features Advanced Shake Reduction for better in-focus pictures and Panorama Shot for majestic landscapes.

Easy-to-use Software

The S5560 features software that makes the mobile experience easier and more enhanced. The auto rotating screen switches directions according to how the user holds the phone, helping maximise screen view when using rich multimedia functions. Forgot to turn off the phone in a meeting? Want to ignore an incoming call? Simply turn the mobile over to engage Etiquette Pause, which instantly mutes the mobile.

Musically Oriented

A great musical companion, the S5560 plays music files so users can relax to their favourite tunes. Want to add more songs to the music library? The Find music feature lets the user record a clip of any song, whether they know what it is or not, send it to the music database for identification, and then purchase it from the online music store. There's always room for more music thanks to the 16GB microSD slot. The 3.5mm earjack lets the user listen in comfort using their favourite earphones.
